SAVE

This spring, do a little **“sprinkler spruce-up”** and don’t forget to sign up for weekly watering advice via email or text at www.WaterIsAwesome.com.

- Conduct monthly, two minute per zone inspections to identify and adjust any sprinkler heads that are spraying water on pavement.
- Adjust sprinkler controller settings to water infrequently (up to twice per week in July and August) and deep into the soil by using the cycle and soak method to promote strong, drought resistant roots.
- Water in the early morning or evening to reduce evaporation.
- Install a three inch layer of mulch around plants to retain soil moisture.
- Replace portions of unused turf grass with native and drought tolerant plants with help from Texas Smartscape: www.txsmartscape.com.

Visit www.SaveArlingtonWater.com for more tips and to sign up for a **FREE sprinkler evaluation**.

LEARN

Love Your Yard - Get ready for spring with help from Arlington Water. During February, Arlington residents can receive a free kit to measure the output of their irrigation system at both Arlington Water Utilities offices at 101 W. Abram St. and 1100 S.W. Green Oaks Blvd.; River Legacy Living Science Center, 703 NW Green Oaks Blvd.; or the Arlington Public Library Lake Arlington Branch, 4000 W. Green Oaks Blvd. (Available while supplies last.)

Celebrate Fix-A-Leak Week! – On Saturday, March 21, Arlington Water Utilities, in partnership with Arlington Public Library and Tarrant Regional Water District, is hosting a Fix-a-Leak Week event from 10 a.m.-12 p.m. at George W. Hawkes Downtown Library, 100 S. Center Street. Professionals will be on site for demonstrations of easy fixes for household and outdoor leaks. Register at www.SaveArlingtonWater.com.
