## Animals That Need Help

People in the community are abusing animals. They don't take care of them right. The owners don't feed them, dose not give them water.

I would make a shelter for pets. They can do anything they want. There would be robot butlers who feed them daily. There would be virtual cars where the dogs can stick their head out of the window. I would call it luxury for pets.

I would also make a restaurant only for pets. There would be robots working there. The robots would understand their language. They would get the food they want anything from around the world.

I would create all kinds of inventions for pets. For dogs, I would make a bone that never loses its taste. For cats, I would make a toy that never breaks. I would make a food dispenser for only animals. They would have to pay a ticket. They would take a ticket from the back of the line.

Some people are cruel. They tease animals that are hungry. When it's raining or it's cold they just leave them out there. When animals get cold they should be able to come to a house anytime.

One day I will make better lives for animals. I will create a better world for them. Where they aren't neglected.
