

## *Animals - Weekly*

*Do you ever want to help an animal out? How about prevent a newborn from getting put in the animal shelter? Well all the people that said yes to one of these should read this article about newborn animals that have to go into the animal shelter and how to prevent it.*

*If your loved one has just adopted a pet and is going to put its baby in the animal shelter then here's something you can tell them to stop that! You start out telling them that animals that don't get adopted in the animal shelter for two weeks have to get put down!! Do you want that to happen to our new baby animal?*

*Next you should tell them this: You know a lot of the animals that are adopted get abused or abandoned? Also a lot of them die from all that ESPECIALLY if it's a baby. So do you think this is the best choice for our baby animal???*

*Finally you should tell them that this baby animal needs a lot of care and has to get spayed or neutered. I know that sounds like a lot for you and I know it is but do you think someone would adopt an animal that has to have all of that done? Remember to say this in a sweet tone.*

*Once you've said all of these you should give them some time to think it over, and remember to first talk about your animal having to get put down, second about your animal getting abused, and last about all the shots it needs! Now go save a life!!!*
